ROBUSTNESS AND VERSATILITY

ROBUSTEZ y POLIVALENCIA

These are the concepts that best Estos son los conceptos que mejor enclosures made of polypropylene. realizadas en polipropileno, The thickness of the walls and the resistentes unique design of the multiple extremadamente rigidas gracias reinforcement braces make these al importante grosor de sus enclosures extremely rigid. These paredes y a una concepción facts lead to a neutral, colourless interna en la que abundan los speaker enclosure designed to last nervios de refuerzo. Todo ello a lifetime, resistant to sunlight, conduce a un recinto acústico water and corrosion.

During the design stage, special resistente al sol, al agua y a la care has been taken to provide a solution for every situation in which these enclosures may be involved. En su diseño se ha prestado The PhiloS can be mounted on a tripod or suspended on a wall or ceiling using the embedded nuts.

Thanks to their well-balanced and natural sound and their high performance specs, these enclosures are particularly suited for any mobile application (mobile discos, A/V renting) as well as fixed installations like discotheques, pubs, or any form of musical entertainment. Last but not least, the PhiloS are also suited for stage monitoring of musical instruments.

define ECLERs PhiloS series. The definen la serie ECLER PhiloS. Las PhiloS are shock-proof acoustic PhiloS son unas cajas acústicas neutro, exento de coloraciones, previsto para una larga vida útil, corrosión

> especial atención a solucionar distintas posibilidades de trabajo en las que se pueden ver envueltas las cajas acústicas. Las PhiloS pueden ser montadas sobre trípode, ó bien suspendidas en la pared ó en el techo utilizando sus tuercas empotradas.

Finalmente, un sonido equilibrado y natural, pero de alto rendimiento, hace que estos recintos sean especialmente útiles para cualquier aplicación móvil (disco móvil, alquiler A/V), para discotecas, terrazas, carpas, pubs, bares musicales, refuerzo de instrumentos musicales,

MAIN FEATURES

CARACTERÍSTICAS PRINCIPALES

Acoustic enclousure made of polypropylene.

Recinto Acústico realizado en polipropileno.

Two-way full range systems - Bass Reflex.

Sistemas Full Range de dos vías - Bass Reflex.

Movable tweeter allows focusing regardless of enclosure position. Altavoz de agudos orientable en función de la posición del recinto.

Bass speaker protected with extremely resistant metallic grille.

Altavoz de graves protegido mediante reja metálica de alta resistencia.

Speak-On Connectors provide output for parallel connection.

Conexiones Speak ON con salida para conexionado en paralelo.

Crossover network with overload protection for the high frequency way.

Filtro divisor de frecuencias con protección de sobrecarga de la vía de agudos.

Stackable with same model enclosures.

Preparada para ser apilada con cajas de la misma referencia.

Handles for easy transport and handling.

Asas para un fácil transporte y manipulación.

Multiple rigging points for suspending in any orientation. Accept standard 35mm mounting stand.

Múltiples puntos de anclaje para suspensión en cualquier sentido. Admiten trípode standard de 35mm.

	4x THISEAGED INSERTS PLYING FORNTS
